## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 9, 11-13, 22-24, 33, 34, 40 and 41 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on September 25, 2006.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-8, 14-20, 25, 27-29, 31, 35, 37 and 38 are rejected under 35 U.S.C. 102(e) as being anticipated by de Casillas (6,347,232).

Art Unit: 3611

de Casillas discloses a portable computer in the form of a cellular phone<sup>1</sup>; and a deployable label base 62 attached to the portable computer and configured to display labels associated with the portable computer, wherein the deployable label base is configured for movement between a first position and a second position, the labels being viewable in the first position and in the second position at least some of the labels are slid into the portable computer, thereby concealing them from view.

Regarding claims 2, 7 and 15, the label base disclosed by de Casillas has two sides. The recitation that the second side is “to display one or more of the labels” is merely a statement of intended use and does not define over the art.

Regarding claims 3, 4, 16 and 17, the label base disclosed by de Casillas can display any kind of label.

Regarding claims 5-7, 18 and 19, see Fig. 12.

Regarding claim 25, the handwritten text constitutes a label, and therefore, the act of writing the text constitutes the step of “attaching labels”.

Regarding claims 27, 28, 37 and 38, de Casillas inherently includes writing any desired information.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

---

<sup>1</sup> Cellular phones have microprocessors and therefore constitute computers.

Art Unit: 3611

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 21, 26, 30 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Casillas (6,347,232).

Regarding claim 21, de Casillas discloses the invention substantially as claimed, as set forth above. However, it is not known whether the label base is flexible. Because it is within the level of ordinary skill of a worker in the art to select from among known materials on the basis of their suitability for the fabrication of a given device, and since a person having ordinary skill in the art would know that a flexible plastic material would be suitable for the fabrication of a label base, it would have been obvious to one having ordinary skill in the art at the time the invention was made to fabricate the label base disclosed by de Casillas from a flexible plastic material as a matter of choice in design, based on such factors as cost and availability of the materials to the designer.

Regarding claims 26, 30 and 36, de Casillas only discloses writing on one side of the label base. However, it is well known to write on both sides of a writable surface, in order to maximize the amount of recorded information. It would have been obvious to one having

Art Unit: 3611

ordinary skill in the art at the time the invention was made to write on both sides of the label base disclosed by de Casillas in order to maximize the amount of recorded information.

***Allowable Subject Matter***

7. Claims 10, 32 and 39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

8. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
